

## Windshield Check List – Questions to ask your customer

### Acoustic Interlayer

- Do you see the word “Acoustic” or “Sound” printed on your windshield?

### Collision Avoidance

- Does your vehicle warn you or brake for you when it detects a potential collision?
- Do you see a camera attachment fixed next to your rear view mirror?

### Condensation or Humidity Sensor

- Does your windshield detect condensation [window fogging] and automatically turn on or turn up the defroster? It could do this before it becomes obvious to the driver.

### Electrochromic Mirror

- Does your rear view mirror automatically dim? Can you see a power line connecting your mirror?

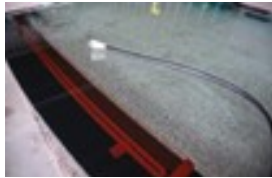

### **Heads Up Display (HUD)**

- Do you see images of your dashboard gauges projected onto the windshield?

### **Heated Windshield/Heated Wiper Park Area**

- Do you see a grid of lines that run along the bottom of your windshield where your wiper blades rest?
- Does the ice melt quickly from your windshield when your defrost button is on?

### **Hydrophobic**

- Does water bead and run off your windshield easily when traveling?

### **Lane Departure Warning**

- Do you get a warning signal when you move out of your lane without signalling?
- Do you see a camera attachment fixed next to your rear view mirror?

### **Light Sensor**

- Do your headlights automatically dim at night when bright lights are approaching or there is oncoming traffic?

(BMW with automatic high beam technology)

### **Rain Sensor**

- Do your windshield wipers automatically come on when your windshield gets wet?

### **Third Frit Visor**

- Is there a black dot pattern that drops down in the middle of your windshield between the sun visors?

### **Tint or Shade**

- Does your vehicle have a shaded band across the top? This is a darker tint about 4-6 inches tall.

## Additional Options and Terminology

### Infrared Interlayer

- An additional layer that reflects infrared light waves from sunlight and in turn reduces the heat build up inside the vehicle.

### Traffic Sign Recognition

- The use of a camera that is able to monitor road signs. Once detected the sign is displayed in the instrument panel and a red border will flash around the display if an infraction (speed limit) is noticed.

### Laminated Hydrophobic Front Door Glass & Front Windshield

- A special coating applied to the glass that repels the water allowing for easier viewing when it's raining.

### Laser Deletion Area

- A small portion of the windshield that has no solar coating, allowing for radar and laser to pass through

*Clearly the choice for Independents*
